Dear Sir/Madam

## **SURDA SETS NEW MONTHLY PRODUCTION RECORD**

Diversified minerals developer and producer India Resources Limited (ASX: IRL) is pleased to advise that a new monthly copper production record of 378 tonnes of copper metal in concentrate has been achieved at the Surda copper mine in western India.

The following table shows a comparison of new records to old:

<b>Monthly Production</b>	<b>May 2011</b>	<b>Previous Best</b>
Copper in concentrate (tonnes)	378	327 (Oct-10)
Ore grade (% Cu)	1.10	1.05 (May-08)
Concentrate production (tonnes)	1,397	1,281 (Oct-10)
Concentrate grade (% Cu)	27.01	26.42 (Apr-11)

This exceptionally higher level of production has been largely driven by improved copper grades. The higher grade ore has mostly been mined from the northern lower part of the mine including the new development drives, cross-cuts and raises at Level 11, which are contributing excellent recoveries. In addition, improved engineering standards in the areas of backfilling and dilution control are having a very positive impact on productivity.

India Resources' Managing Director, Arvind Misra, said that the efforts in enhancing operating performance at the Surda Mine were showing solid results under the leadership of General Manager - Surda Operations.

Yours faithfully

**Arvind Misra**  
Managing Director
