Dear Sir/Madam

SURDA RECORD QUARTERLY PRODUCTION

India Resources Limited (ASX: IRL) is pleased to advise that the first quarter of the 2011 financial year has commenced with a record breaking 855 tonnes of copper metal-in-concentrate being produced from the Surda Mine and Mosaboni Concentrator Plant in India. This result represents an increase of 18 tonnes of metal-in-concentrate from the previous record of 838 tonnes achieved in the March 2010 quarter.

India Resources Managing Director, Arvind Misra, said that this was a very pleasing all round performance for the Surda operations and that the ongoing improvements were keeping the Company on track to meet its production target of 340 tonnes of copper in concentrate per month.

Item	New record September 2010 quarter (tonnes)	Previous record March 2010 quarter (tonnes)	Relative increase (%)
Tramming	110,223	109,414	0.74%
Hoisting	109,739	105,770	3.75%
Trucking	106,056	105,726	0.31%
Processed	106,153	104,997	1.10%
Feed grade (% Cu)	0.88	0.88	0.00%
Recovery (%)	93.19	92.96	0.25%
Metal-in-concentrate (MT)	855	838	2.03%
Concentrate grade (% Cu)	25.44	24.50	3.84%

Although the grade for the period was in keeping with previous quarters, the results achieved in the month of September of 0.95% copper are extremely encouraging. Development on 11 Level is on track and the grades in this area are very positive.

A new mining block No 38 is now in production and with the monsoon season coming to an end, the challenges of constant electrical supply and additional underground pumping are no longer there.

Ongoing production improvements are again expected in the upcoming quarters.

Yours faithfully

Arvind Misra
Managing Director
