Manager Announcements
ASX Limited
Level 4
20 Bridge Street
SYDNEY NSW 2000

Dear Sir/Madam

SURDA SETS NEW MONTHLY PRODUCTION RECORD

Diversified minerals developer and producer India Resources Limited (ASX: IRL) is pleased to advise that a new monthly copper production record has been achieved at the Surda copper mine in western India.

Copper production at Surda for the month of October 2010 was 327 tonnes of metal-in-concentrate. The average feed grade for the month was 0.94% Cu. The previous copper production record for the mine was 313 tonnes in April 2009.

As previously foreshadowed, ore production increased during the period from higher grade areas within the mine plan.

At these monthly production levels the Surda mine generates positive operating cash flows including head office operating costs.

India Resources' Managing Director, Arvind Misra, said that the Company's efforts in turning around its operating performance were showing solid results. With a stronger balance sheet and improved cash flows from the Surda operations, management was also now focussing on advancing the Company's other development assets and on exploration programmes on its mineral tenements.

Yours faithfully

Arvind Misra
Managing Director
